Comments:	<p>The navigator is a stable and easy to sail boat even single handed, and would make an excellent boat for a first timer she could also be used as a trailer sailer if you have a road trailer that would suit.</p> <p>I attach the builder's certificate for the Boat, and a copy of the technical details from one of the original sales brochures, as well as a photograph taken last year, near the end of the season. The boat would seem to have had about 4 owners including myself.</p> <p>I am asking for £2500 for the boat, but without an engine, my engine is just 3 years old , and has done less than 20 hours. If someone is interested, I am willing to discuss the price.</p> <p>The boat is currently laying in a Gosport marina, and can be seen by arrangement. The trailer is specially designed for the boat and the main sail in my heated garden shed.</p> <p>The boat has been antifouled for this years' sailing, and is basically ready to go, once I clean the winter leaves and dust away.</p> <p>I am happy to throw in some fenders, bruce anchor and warps.</p> <p>There is a log, depth finder, and a compass, all working</p> <p>There is a leisure battery in good order</p> <p>There is a trilight at the mast head . The original port, starboard and stern lights are still there, but I have never used them.</p>

Price £2500 ono
